Subject: USGS Scientific Integrity Survey and Recommendations
Attachments: 2020 SI Survey Report.pdf; SI Recommendations 033121.pdf

All: As promised, attached please find results from a 2020 survey on scientific integrity at the USGS (Anne: The survey itself is shown in Appendix B starting on page 24). Surveys will follow every two years. A separate document is attached with a set of recommendations (note that the one concern on scientists required to have permission before speaking to the press was corrected after I sent the recommendations report).
